

WHOLEHOG[®] III

ULTIMATE LIGHTING CONTROL CONSOLE

- Wholehog III Operating System
- Uses distributed network processing.
- Supports external touchscreen monitors
- USB accessories supported

Flying Pig Systems' Wholehog III console is a perfect blend of style and function.

The distinctive blue aluminum look exudes a strength and quality you would expect from the world's most advanced lighting control system.

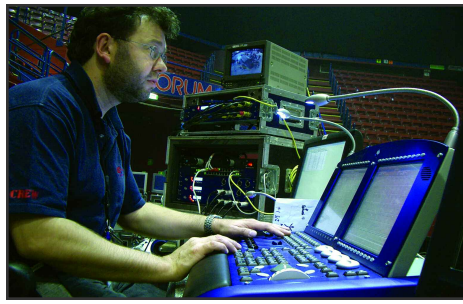

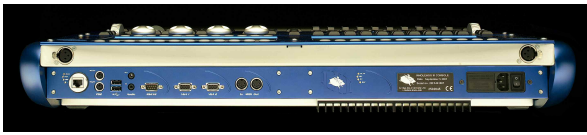

The console has retained the compact footprint and weight of the Wholehog 2 making it easy to move around, and inexpensive to transport. But its capabilities can be expanded as required with a variety of accessories, connected either via the 100Base-TX Fast Ethernet network or USB.

The powerful custom designed electronics within the console are designed to be convection cooled removing the need for fans and making the console virtually silent. An internal hard drive stores all show data, and external backup is provided by a ZIP drive and a re-writeable CD-ROM drive, discretely accessed underneath the classic Wholehog leather armrest.

The console is supplied with two LED desklights, offering a choice of illumination in white or blue depending on your working environment. The LCD backlighting and the contrast on the screens can also be adjusted to suit your preferences. One more example of the detail that sets this console apart!

The layout is based on the industry-standard Wholehog 2, giving the console an instantly familiar feel. But it has been greatly enhanced with additional keys and controls, and large high contrast colour LCD touch screens that can be tilted for optimum viewing.

LIGHTING CONTROL HAS NEVER LOOKED SO GOOD

- Console construction of precision-machined aluminum, with a tough wear-resistant anodised finish.
- Two large high-brightness colour touchscreens, with adjustable viewing angle.
- Backlit trackball with configurable buttons (4) for cursor and position control
- Playback faders (10) with familiar Wholehog II playback controls (Choose, Go, Pause & Flash)
- Custom-designed embedded electronics—does not use a standard computer motherboard
- Supports two external monitors (VGA/SVGA)—can be touchscreens
- Virtually silent operation—no fans
- Internal hard disk drive, ZIP drive and re-writeable CD-ROM drive.
- MIDI Input and Output supports Midi Show Control and Midi Time Code
- Universal Serial Bus ports (2) for printer and Wholehog III accessories (e.g. playback wing)
- Audio stereo line in and out, with two internal speakers
- Realtime clock
- Desklights, feedback LEDs and LCD backlighting all dimmable
- Designed for easy maintenance.
- Auto-ranging mains input (90-250 VAC)
- Power-fail protection (internal battery) prevents data loss on power fail
- Overall dimensions: 760mm (w) x 580mm (d) x 110mm (h), footprint smaller
- Weight 22.5kg
